

CROSS-Ocean Science Outreach

The Science & Math Investigative Learning Experiences (SMILE) Program held the Summer Teachers' Workshop on the OSU campus. SMILE developed and delivered the 2010-2011 modules and materials for club activities to all clubs at the Ocean Science sessions.

At Teachers' Workshops, the High School teachers that serve as SMILE Club advisors for our eleven HS clubs, gain knowledge about Oceans Sciences and receive materials to engage students in their SMILE clubs.
