

Julian Dates to Calendar Dates

Month in the Gregorian calendar	Julian Dates	number to add to date to get Julian date
January	1-31	0
February	32-59	31
March	60-90	59
April	91-120	90
May	121-151	120
June	152-181	151
July	182-212	181
August	213-243	212
September	244-273	243
October	274-304	273
November	305-334	304
December	225-365	334

example: in the Gregorian calendar my birthday is on September 5. What is the Julian date of September 5?

answer: September is from 244-273 in Julian dates. So September 5 is $243 + 5$. My birthday is on day # 248.

what Julian date is your birthday?

this information is only correct for non-leap years.
